ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: ON DEMAND PROVISIONING OF APPLICATIONS

Traditional Approach

PRIOR ART

(57) Abstract: A system and method for on demand provisioning of applications to clients, the system providing on demand access to applications by clients and their users over a computer communication system such as the Internet, thereby eliminating the need for clients to independently purchase, install, integrate and maintain the applications on their own systems. The system and method designed to create and install a separate, stand alone, dedicated copy or instance of the applications for each new client and to provide the clients with on demand access to provisioning

and management functions allowing the clients to purchase, manage and maintain the applications on demand.
